SEP sesam Open-Xchange

Networkwide and Cross Platform Data Availability

SEP AG

SEP AG is a leading pioneer in network-wide and cross platform data availability software. Since 1992 SEP has developed industry-leading technology for data security and has integrated this into one of the fastest and most reliable data back up solutions available today. With SEP`s proven products for back up, recovery and disaster recovery data security and availability has become a safe, reliable and extremely affordable solution for today`s multinational companies.
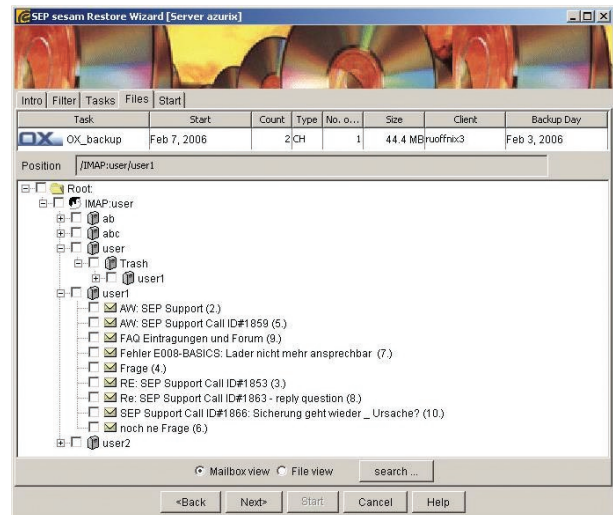

Ready for Open-Xchange

SEP now offers a cost-effective method to back up and restore the Open-Xchange Server. SEP sesam delivers unparalleled back up security in your Open-Xchange environment. Because of its overwhelming price/performance advantage more professional users are choosing Open-Xchange for their daily work activities. SEP sesam Single Mail Restore used with the online tools provided by Open-Xchange, support the restore of data down to a single mail. SEP sesam makes access to secured user data fast and easy. Moving to Open-Xchange has never been easier or more economical than it is today!

OPEN–XCHANGE™
PARTNER

keep in touch

Our strategic partnership with Novell/SUSE and RedHat provides our customers trouble-free integration of SEP sesam on all versions of the world's leading Linux software. Further, with support for both Windows and Unix platforms, SEP sesam offers a comprehensive solution for heterogeneous system topologies.

Data Security for Open-Xchange Server

The SEP Database Online Module for Open-Xchange enables a complete backup of the OX-environment on file basis in a logical level (mailbox and single mail). With the simple and clearly arranged GUI (Restore-GUI) the selection of any user mail as well as its restore on the original or another mailbox is possible. There are numerous functions available for the automatic flow of restore and recovery which make it easy for the administrator to reconstruct the wanted mail data. So-called public folders and the creation of (new) restore folders is also supported.

Database und Groupware Online Modules

SEP sesam offers the largest selection of database and groupware online modules in the industry. These application options run on Linux, Microsoft Windows, AIX and SUN Solaris and provide the highest level of assurance for data backup and restore security in heterogeneous networks. Further information for database and groupware backup and recovery can be found at http://www.sep.de.
